EDUCATION

- **University of Illinois Urbana Champaign** Champaign/Urbana, IL, USA
BS Computer Science, Game Studies and Design Minor Aug 2024 - May 2028
 - GPA: 3.81/4.00
 - Relevant Coursework: Data Structures and Algorithms, Linear Algebra, Top Down Video Game Design, Intro to Game Studies, Intro to Video Game Development Processes

EXPERIENCE

- **The Stu/dio at Illinois** Champaign, IL, USA
Game Programmer & Playtester August 2025 - Now
 - **Collaborated** with designers, programmers, and sponsors to **implement** a Computational Fluid Dynamics (CFD) visualizer using UE5's Niagara Particle System and Blueprints.
 - **Engineered** interactive and modular UI components in UE5 VR to render real-world CFD meshes generated collaboratively using OpenFOAM.
 - **Translated** user and playtester feedback into actionable gameplay improvements for a Unity mobile title, managing the macOS build pipeline to ship a major version update to the iOS App Store.
- **Discovery Partners Institute** May 2025 - August 2025
Summer Tech and Research Intern Chicago, IL, USA
 - **Integrated** MongoDB into a social networking app using Kotlin Coroutines for research, turning in-person connections into online connections.
 - **Processed** 30+ logs from MongoDB Atlas using a Python algorithm, finding 25 social encounters.

COURSEWORK AND PROJECTS

- **GSD 405: Introduction to the Video Game Development Process** January 2026 - May 2026
Programmer & Designer Champaign, IL, USA
 - **Architected and programmed** all core technical systems in Unity, building frameworks for 2D platforming physics, combat mechanics, and item functionality.
 - **Collaborated** with artists and audio engineers to implement sprites, animations, and audio in Unity.
- **CS 415: Game Development** February 2026 - May 2026
Programmer & Designer Champaign, IL, USA
 - **Engineered** a robust multiplayer framework in UE5 using the Advanced Steam Sessions plugin.
 - **Prototyped** core prop-hunt mechanics, logic and systems, enabling players to disguise themselves, interact with the environment, and navigate the game loop.

ACTIVITIES AND LEADERSHIP

- **Gen.G ESports** Jul 2026 - Aug 2026
Game Design Practicum Trainee Seoul, South Korea
 - **Collaborated** within a 6-person team to ideate and design an original game, conducting targeted market research to ensure the core mechanics appealed to the target audience.
 - **Facilitated consensus** on design decisions by mediating team discussions, ultimately pitching the unified game concept to an audience and Gen.G C-suite executive.

SKILLS

- **Programming Languages:** GDScript, Python, C++, C#
- **Game Engines:** Unreal Engine 5, Godot, Unity Game Engine
- **Tools & Platforms:** Visual Studio, Perforce, Git, GitHub, MongoDB, Blender, Jira, Rider, Audacity
- **Languages:** English, Cantonese (Conversational)
